points to check

Regulation (EU) 2024/1624

AMLR Checklist

7 obligations, 35 points to check in your firm before 10 July 2027.

Free resource for lawyers

November 2026 edition · norvy.lu

Why this checklist

Regulation (EU) 2024/1624, known as AMLR, applies from **10 July 2027**. Unlike previous directives, it is a regulation: it applies directly in every Member State, with no transposition. Lawyers remain subject to anti-money laundering obligations when they act in the transactions covered by the text.

The core principles stay the same, but the requirements become more precise: what to check, how to document it, how long to keep it. What matters on inspection is what the firm can prove.

How to use it

For each of the 7 obligations, tick a point only if it is in place and documented in your firm. Then add up your points on the grid on page 10. Allow about 20 minutes.

R Requirement of the Regulation BP Recommended good practice

Contents

01 AML policy and organisation 3
02 Firm-wide risk assessment 4
03 Customer due diligence 5
04 Beneficial owners 6
05 PEP and sanctions screening 7
06 Enhanced due diligence and reporting 8
07 Record keeping, traceability and training 9
— Your score 10

Obligation 01 / 07

01

AML policy and organisation

Every inspection starts here: the firm needs written rules and a clearly responsible person.

- [ ] 1.1 **Written AML policies and procedures** R
  They cover risk assessment, customer due diligence, suspicious reports and record keeping.

- [ ] 1.2 **A designated AML compliance lead** R
  An identified partner or manager, with the means to fulfil the role.

- [ ] 1.3 **Procedures proportionate to the firm's size** R
  The Regulation allows proportionality, not the absence of procedures.

- [ ] 1.4 **At least an annual policy review** BP
  And an update after any significant regulatory change.

- [ ] 1.5 **Recorded circulation to all staff** BP
  Everyone confirms they have read the policy.

In Norvy

The firm's procedures apply in every matter, the same way for every lawyer.

Obligation 02 / 07

02

Firm-wide risk assessment

The risk-based approach remains at the core. It must be written down and justified.

- [ ] 2.1 **A written firm-wide risk assessment** R
  It takes into account the risk factors set out in the Regulation.

- [ ] 2.2 **Customer risk** R
  Individuals, companies, holdings, trusts, non-resident clients.

- [ ] 2.3 **Service risk** R
  Company formation, real estate, handling client funds, trust services.

- [ ] 2.4 **Geographic risk** R
  High-risk third countries identified by the EU, sensitive jurisdictions.

- [ ] 2.5 **Documented rating criteria and regular updates** R
  Low, standard or high risk, using criteria applied to all.

In Norvy

Each matter is qualified at opening: type of engagement, amount, one-off transaction or ongoing relationship. The due diligence level follows.

Obligation 03 / 07

03

Customer due diligence

Identify and verify the client before accepting the engagement, then keep the information current.

- [ ] 3.1 **Client identification and verification** R
  Using reliable documents or electronic identification means.

- [ ] 3.2 **Purpose and nature of the relationship documented** R
  Why the client comes to you, for which transaction.

- [ ] 3.3 **Due diligence proportionate to risk** R
  Simplified, standard or enhanced, with the reason for the choice.

- [ ] 3.4 **Information updated regularly** R
  More often for high-risk clients, and whenever the situation changes.

- [ ] 3.5 **Source of funds checked when risk requires** R
  With supporting documents kept on file.

In Norvy

The client file fills itself from official registers, the client uploads documents through a secure link and Norvy reads them automatically.

Obligation 04 / 07

04
Beneficial owners

The most inspected point. AMLR harmonises the rules and strengthens verification.

- [ ] 4.1 **The 25%-or-more threshold applied** R
  The former "more than 25%" threshold no longer applies: exactly 25% counts.

- [ ] 4.2 **Verification not based on the register alone** R
  The beneficial ownership register is used to cross-check, not as the only source.

- [ ] 4.3 **Direct and indirect ownership chain established** R
  Down to the natural persons, including across several countries.

- [ ] 4.4 **Discrepancies with the register reported** R
  Following the procedure in your country.

- [ ] 4.5 **Updated after any change** R
  What counts is the situation on the day of inspection, not at opening.

In Norvy

Norvy reads extracts, articles and registers, builds the beneficial ownership chart and flags missing links.

Obligation 05 / 07

05

PEP and sanctions screening

At onboarding, then throughout the relationship.

- [ ] 5.1 **Screening at onboarding** R
  Client and beneficial owners, against EU and UN sanctions lists.

- [ ] 5.2 **Detection of politically exposed persons** R
  Including family members and close associates.

- [ ] 5.3 **Senior approval for PEP relationships** R
  With enhanced due diligence measures.

- [ ] 5.4 **Ongoing monitoring, not only at opening** BP
  Lists change: a client can be added during the engagement.

- [ ] 5.5 **Results kept, including negative ones** BP
  A negative result proves the check was carried out.

In Norvy

Sanctions, PEP and adverse media screening runs when the matter is opened, then ongoing monitoring takes over. Unlimited.

Obligation 06 / 07

06

Enhanced due diligence and reporting

High-risk situations require more measures, and a clear procedure when there is suspicion.

- [ ] 6.1 **Enhanced due diligence situations identified** R
  PEPs, high-risk third countries, complex structures, unusual transactions.

- [ ] 6.2 **Enhanced measures documented** R
  Source of funds and wealth, economic rationale, closer monitoring.

- [ ] 6.3 **An internal suspicious report procedure** R
  Who spots, who decides, who reports, under the rules applying to lawyers in your country.

- [ ] 6.4 **Refusing or ending the relationship when due diligence is impossible** R
  And a record of that decision.

- [ ] 6.5 **Regular review of high-risk matters** BP
  With a written record.

In Norvy

The due diligence level sets the list of documents to request. High-risk matters are flagged and followed separately.

Obligation 07 / 07

07

Record keeping, traceability and training

What you cannot show does not exist in the eyes of an inspector.

- [ ] 7.1 **5-year retention after the relationship ends** R
  Documents, checks and assessments. Authorities may require up to 5 more years.

- [ ] 7.2 **Deletion of personal data at the end of the period** R
  Unless another legal retention duty applies.

- [ ] 7.3 **AML training for the relevant staff** R
  Adapted to each person's role.

- [ ] 7.4 **Every check dated, with its author** BP
  And the reasoning behind rating decisions.

- [ ] 7.5 **An evidence file produced quickly** BP
  For a Bar inspection or a request from the authorities.

In Norvy

Every check is time-stamped and stored in the matter. The complete evidence file comes out in one click.

Your score

Your score

Add up the points you ticked (35 in total).

My total _____ / 35

Points	Level	What to do
30 – 35	**Solid**	Keep it up and make sure everything can be proven quickly.
22 – 29	**To consolidate**	Close the gaps within 6 months, starting with obligations 03 to 05.
15 – 21	**Insufficient**	Launch a compliance plan before July 2027.
0 – 14	**Critical**	Top priority: policy, risk assessment and customer due diligence.
